### **NOMAX**

Designing brochures and online graphics

Redesigning company website, CMS implementation

Managing multiple projects from the drawing board to delivery

Talking with external clients and translating their needs into wireframes and sets of requirements

## QUICK BIO

I am a multidisciplinary designer with 6+ years of experience.

I worked primarily with digital media such as websites and app interfaces. Since last year I started to learn HTML5 and CSS3 supported with Bootstrap's grid.

Now I know some basics about JavaScript, jQuery and using GIT so I can work more effectively and co-operate with other programmers to build high quality projects.

I am looking for a company that will help me improve myself in Front-End Development path.

## EDUCATION

2003- 2007

### **HIGH SCHOOL OF MIKOLAJ REJ IN JEDRZEJOW**
